

Maximum capacity 70 kg, up to 3.4 meters in height

The manual plate lifter, designed to reduce costs while saving time, now makes it possible to assemble them with just one person. Ideal for plasterboard, insulating panels and wooden panels.

STRUTTURA

- Double safety system (automatic brake + brake on the pole)
- Steel cable Ø4 mm
- Winch with automatic brake device
- Telescopic pole with synchronized movements
- Wheels with brake at the base for easy movements
- No tools for assembly, in two movements it is ready for use
- Adjustable and rotating plate support for assembly precision
- Easily transportable as a trolley thanks to the two rear wheels

Model	Height of work	Dimensions open feet	Capacity of loading	Max panel dimensions	Support capacity	Lifter Weight
DWM 380	3,4 mt	1,06 mt x 1,06 mt	70 kg	1,20 x 4,90 mt	70 kg	41 kg
