

Glass manipulator Robby 600

**For all terrains,
load capacity 600 kg**

Ideal robot for handling or laying large windows and heavy glass on site. Equipped with pneumatic suckers and electric motor, powered by batteries. The movements of all the parts are easily controlled by one person

- Double circuit suction cups with a capacity of 600 kg - EN 13155
- Audible and visual alarms in case of poor functionality of the suckers
- Fully electric handling
- Can be used on all types of terrain
- Joint of the telescopic arm which allows it to pass through the doors
- 2 lateral stabilizers
- Side translation of 200 mm to facilitate installation

Total weight	850 kg
Height	1.430 mm
Width	960 mm
Length	2.100 mm
Extension and extension	600 mm
Working corner of the suction cup holder	-100° / +100°
Lateral adjustment	200 mm
Number of suckers	4 of 400 mm
Lifting height	2.900 mm
Charging voltage	230 Volt
Built-in charger	Cetek XT 14.000
Batteries	(2x12V) / 2x105 A
Autonomy	16 h
Movement speed	2
Load capacity on the hook	650 kg
