

Ideal installers of windows, conditioners, antennas and skylights

IN EVIDENCE

- ▶ Immediate use
- ▶ Maximum freedom of movement
- ▶ It does not ruin surfaces

STRUCTURE

- The WIN200 safety anchor is a useful accessory for the operator who is in situations without a specific fall protection system, ensuring maximum freedom of movement.
- The use is immediate: the device is installed in a few moments, without the risk of ruining the existing structures. The operator hooks his harness to the retractable cable connected to WIN200.
- WIN200 is made entirely of stainless steel, therefore it ensures long life and is able to resist the tear caused by the possible fall of the operator.
- It is equipped with special anti-scratch rubber so as not to damage the support surfaces.
- Robust and with double adjustment, for fixing to door and window frames. Openings from 50 to 135 cm.
- Conforms to UNI EN 795 type B CE. PPE certified by a notified certification body.
